FOR THE LAND THAT I LOVE™

ATV / UTV ARENA RAKE

RA 1084 XL

RIDE-READY RESULTS IN NO TIME!

A level and consistent arena footing that feels the same, each and every day helps you and your horse excel. With the Riata ATV/UTV Arena Drag, a ride-ready routine is quick and easy. Use your go-to tow vehicle—the Riata Arena Drag works great with ATVs, UTVs, and small tractors. Ride with peace of mind: the Riata ATV/UTV Arena Drag is designed for arena footing and designed with equestrians—not farmers or landscapers—in mind!

ATV / UTV ARENA RAKE

RA1084

EASY ARENA MAINTENANCE

LIFT & AERATE

The Riata ATV Arena Rake's precision tine bar (inset, top) lifts and aerates arena footing, breaking down compaction and creating proper consistency and even depth. The tine bar consists of 19 hot-forged, high-carbon steel tines, spaced every 2.75" to ensure even and consistent aeration.

GROOM

The ATV Arena Rake's grooming rake (inset, mid) breaks up clumps and leaves a perfectly groomed, smooth surface. It can be easily adjusted and set with a single turnbuckle for consistent results every use!

FEATURES

1. BALL HITCH - Configured for a 1 7/8-inch ball hitch 14-16" high. Ideal for use with ATVs, UTVs, and sub-compact tractors.

2. GAUGE WHEELS - Two large gauge wheels stabilize the working depth of the tool and allow for quick transportation.

3. TINE BAR - Hot-forged steel tines demolish compaction and lift and aerate arena footing. 12" x 1" tines, spaced 2.75" apart.

4. GROOMING RAKE - Set at a low angle to provide even pressure, minimize moisture loss, and create a beautiful finish.

5. ADJUSTMENT TURNBUCKLE - Easily adjust the angle of the grooming rake depending on your footing needs and composition.

6. CONTROL JACK - Quickly engage and disengage the working components. Allows quick transport and repeatable results.
